

How Do Cyclists Respond To Approaching Cars? (Study 2)

Instructions ▲

You are invited to participate in a research study entitled “How do cyclists respond to approaching cars? (study 2)”. The study is being conducted by Ir. Yke Bauke Eisma, Dr. Pavlo Bazilinskyy, Dr. Dimitra Dodou, and Dr. Joost de Winter, Department of Cognitive Robotics, Delft University of Technology, The Netherlands, p.bazilinskyy@tudelft.nl (mailto:p.bazilinskyy@tudelft.nl).

The purpose of this research is to investigate how cyclists respond to approaching cars.

You are free to contact the investigator at the above email address to ask questions about the study. You must be at least 18 years old to participate. The survey will take approximately 25 minutes of your time. In case you participated in a previous survey of one of the present investigators, your responses may be combined with the previous survey.

The information collected in the survey is anonymous. Participants will not be personally identifiable in any research papers arising from this study. If you agree to participate and understand that your participation is voluntary, then continue. If you would not like to participate, then please close this page.

Experiment

You will be asked to leave Appen to participate in the rating task. You will need to open the link below. Do not close this tab. In the end of the experiment you will be given a code to input in the next question on this tab. Please take a note of the code. Without the code, you will not be able to receive money for your participation. All images will be downloaded before the start of the experiment. It may take a few minutes. Please do not close your browser during that time.

Open this link (<https://cycling-anim-crowdsourcing-2.herokuapp.com>) to start the experiment.

Type the code that you received at the end of the experiment. (required)

Miscellaneous questions

In which year do you think that most cars will be able to drive fully automatically in your country of residence? (required)

Please provide any suggestions that could help engineers to build safe and enjoyable automated cars.
