

Measuring Clarity Of Textual External Human Machine Interfaces For Automated Vehicles

Instructions ▲

You are invited to participate in a research study entitled "Measuring clarity of textual external Human Machine Interfaces for automated vehicles". The study is being conducted by Dr. Pavlo Bazilinskyy, Dr. Dimitra Dodou, and Dr. Joost de Winter, Department of Cognitive Robotics, Delft University of Technology, The Netherlands, p.bazilinskyy@tudelft.nl (mailto:p.bazilinskyy@tudelft.nl).

You are free to contact the investigator at the above email address to ask questions about the study. You must be at least 18 years old to participate. You will rate 80 images of a car with different textual messages on a display on the front bumper. The survey will take approximately 20 minutes of your time.

In case you participated in a previous survey of one of the present investigators, your responses may be combined with the previous survey. The information collected in the survey is anonymous. Participants will not be personally identifiable in any research papers arising from this study. If you agree to participate and understand that your participation is voluntary, then continue. If you would not like to participate, then please close this page. Before the study starts, the images will be preloaded. This may take a few minutes depending on your internet connection.

Please do not use Internet Explorer for this study.

- ☐ I'll just check for you.

Shall we go to the gym now? (required)

- ☐ I'm too tired.
- ☐ It's very good.
- ☐ Not at all.

Experiment to measure clarity of textual external Human Machine Interfaces for automated vehicles In this experiment, you will see multiple images of a vehicle with a textual message on a display on the front bumper. You will be asked to leave Appen to participate in the experiment. You will need to open the link below. Do not close this tab. At the end of the experiment, you will be given a code to input in the next question on this tab. Please take a note of the code. Without the code, you will not be able to receive money for your participation. All images will be downloaded before the start of the experiment. It may take a few minutes. Please do not close your browser during that time.

Open this link (<https://text-crowdsourced.herokuapp.com>) to start the experiment.

Type the code that you received at the end of the experiment. (required)

Miscellaneous questions

In which year do you think that most cars will be able to drive fully automatically in your country of residence? (required)

Please provide any suggestions that could help engineers to build safe and enjoyable automated cars.
